EDUCATION

University School of Information and Communication Technology (USICT)

New Delhi, India

Bachelor of Technology (Btech) - Information Technology (IT) ; CGPA: 8.3 / 10

Aug, 2023 - Present

PROJECTS

AgriShield – AI-Powered Heavy Metal Risk Assessment & Decision Support System June 2026 - Aug 2026

Next.js | React.js | FastAPI | Python | SQLite | Tailwind CSS | Recharts | Google Gemini API

- Built an AI-powered decision-support system for heavy-metal pollution, bioavailability, food-safety, and human-health risk assessment in agricultural environments.
- Developed interactive dashboards and visualizations using Next.js, React.js, Tailwind CSS, Recharts, and Python to present assessment results and insights.
- Integrated FastAPI, SQLite, and Google Gemini API to provide AI-powered recommendations and support data-driven sustainable agriculture decisions.

EPL Data Analysis & Interactive Dashboard

July 2025 - Aug 2025

Python | Pandas | NumPy | Matplotlib | Seaborn | Power BI | EDA | Machine Learning

- Conducted end-to-end analysis of English Premier League (1993–2022) match data using Python, including data cleaning, EDA, statistical analysis, and feature engineering.
- Analyzed team performance, goal-scoring trends, home advantage, and match outcomes, while developing custom metrics such as Match Intensity and Aggressiveness.
- Built an interactive Power BI dashboard and explored machine learning techniques for match-outcome prediction and data-driven insights.

EcoTrack – Climate Action Web Application

June 2025 - Aug 2025

Next.js | React.js | JavaScript | Tailwind CSS | Leaflet.js | Recharts

- Developed a responsive climate-action web application featuring a carbon footprint calculator, climate pledges, educational modules, and sustainability resources.
- Implemented interactive maps using Leaflet.js and data visualizations using Recharts to present environmental information effectively.
- Built the frontend using Next.js, React.js, Tailwind CSS, and JavaScript, following responsive and modular component-based design.

ACHIEVEMENTS

- Completed **6-week AICTE IDEA Lab Summer Internship 2025** at GGSIPU, contributing to an AI-based healthcare project on age and gender prediction using real RGB dental images.
- Completed **6-week AICTE IDEA Lab Summer Internship 2026** at GGSIPU, contributing to AgriShield, an AI-powered heavy-metal risk assessment and decision support system.
- Completed **IBM SkillsBuild Project-Based Learning Program 2025**, developing a climate action web application using modern frontend technologies.
- Completed **IBM SkillsBuild Academic Internship 2026** in Big Data & Business Management, developing an interactive Space Mission Analytics Dashboard.
- **2nd Position – Data Analysis Challenge**, ACM Tech Week 2025, USICT ACM Student Chapter, GGSIPU.
- Qualified Internal Round – **Smart India Hackathon (SIH) 2025** with an IoT and AI-based disaster management solution.
- Completed **Python for Data Science & Machine Learning Bootcamp** by Udemy.
- Completed Stage 1 of **e-Yantra Robotics Competition 2025** by IIT Bombay.

TECHNICAL SKILLS

- **Programming Languages:** Python, C++, C, Java, SQL, JavaScript
- **Web Technologies:** HTML, CSS, React.js, Next.js, Tailwind CSS, FastAPI, REST APIs
- **Data Science & Analytics:** Machine Learning, Deep Learning, Statistics, Data Analysis, EDA
- **Libraries & Frameworks:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Keras, OpenCV, Recharts
- **Databases:** MySQL, PostgreSQL, SQLite
- **Tools & Platforms:** Git, GitHub, Google Colab, Jupyter Notebook, VS Code, Power BI, Tableau
- **Core Concepts:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Problem Solving
- **Design & Productivity:** MS Office Suite, Adobe Photoshop
